PRODUCT OVERVIEW

The GRC Series Gravity Conveyor is a simple, reliable and cost-effective way to move cartons, totes and packages without power. Product is conveyed by a slight gravity decline, or moved manually along level sections. With no motors or electrical components, it delivers low maintenance, minimal running costs and a long service life. Available in straights, curves and spurs, it integrates easily with powered conveyor and workstations.

APPLICATIONS

Developed for warehousing, transport & freight logistics, carton & tote handling, packing and dispatch, loading and unloading, accumulation buffers, and order-picking lines.
