PRODUCT OVERVIEW

The Pallet Chain Conveyor Series is designed for high-performance material handling in demanding industrial environments. Built for reliability and efficiency, this conveyor system ensures smooth transportation of pallets, containers, and heavy goods across various applications. Key features of the Heavy-Duty Chain Conveyor include durability, adaptability, seamless integration with automated systems, and low maintenance requirements. When your operation requires a robust and efficient conveyor solution, the Heavy-Duty Chain Conveyor Series delivers exceptional performance while maintaining flexibility for custom configurations. Suitable for straight-line transportation, accumulation, and automated sorting systems.

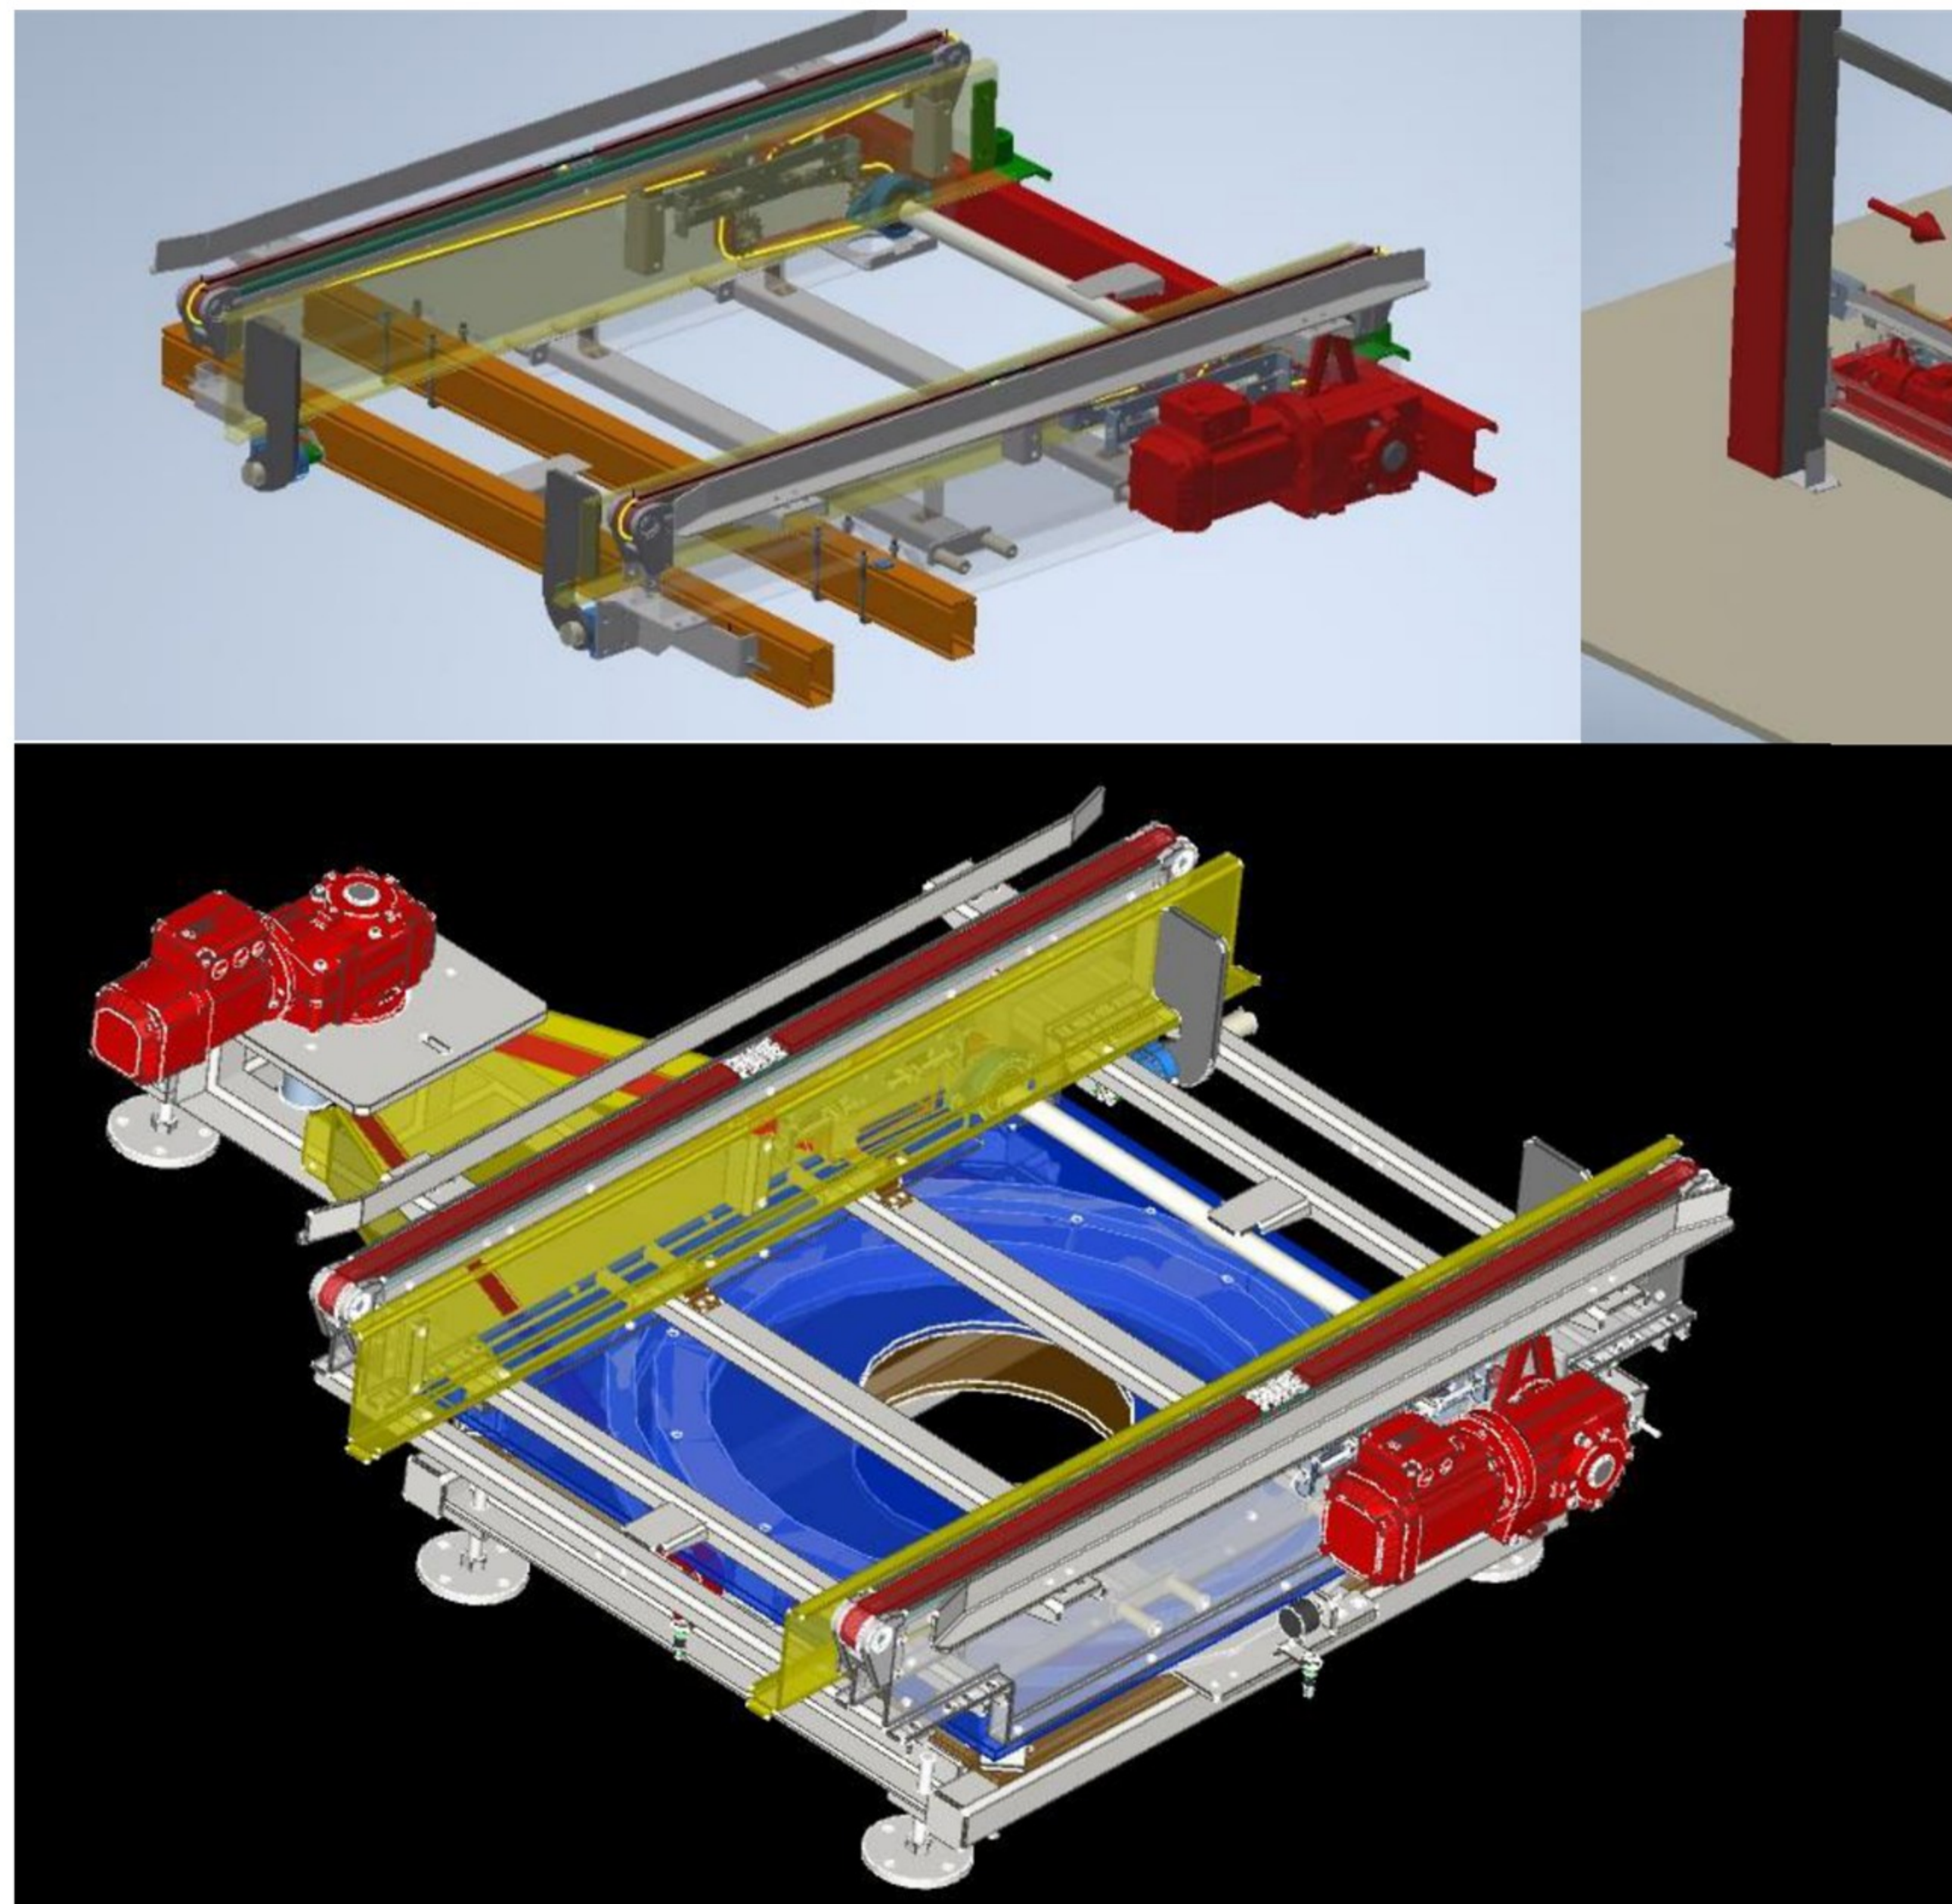

APPLICATIONS

Pallet Chain Conveyor can be used for general pallet transportation, IBC transportation, heavy goods, pallet accumulation, robotic palletising applications, and more. It can also be used in conjunction with stretch wrapping equipment and pallet DWS cubing machines.

Industry Applications:

Food, Beverage & Confectionary Processing, Logistics Freight & Parcel, Airport, Warehousing, Machine in-feed & out-feed and more

DESIGN OVERVIEW

SPECIFICATIONS

Frame Construction	Formed Mild Steel or Aluminium Chain profile mounted on mild steel sub-frame construction
Conveyor Length (CL)	1000mm - 6000mm
Chain Centres (CC)	500mm - 1100mm
Top of Chain Height (TOC)	500mm - 1500mm
Chain Type (CT)	08B, 10A, 12A, 16A
Load Capacity (LC)	1500KG (max)
Conveyor Speed (CS)	8m/min - 30m/min
Drive Motor	SEW Euro Drive (Std)
Conveyor Width	To suit Australian Standard pallet - 1165 x 1165 x 150
Conveyor Height	As per requirement
Load	1000kg
Checker Plate Infill	Where Required
Gear Motors	SEW gear motors
Bearings	NSK Bearings
Brackets	PE Brackets
Material	Mild Steel
Coating	Mild steel components - Powder Coated / Painted
Color	Graphite Grey
